Black Electric cable with tinned copper mesh - The Original Creative-Cables - RR01 round 3x0.75mm

N° of cores:: 3x0.75

Description

The original Creative-Cables.

Some call them colourful textile cables, others fabric covered cables, whilst others still simply call them coloured cables. But really, for over 10 years their real name has been Creative-Cables.

They are the news of 2016: the elegance and sophistication of copper used to partially cover a special black cable for an incredible effect and brilliance.

The singularity of the metallic details makes them perfect both for vintage and modern environments, especially those inspired to industrial chic atmospheres. Available only in 3 conductor version (with ground wire).

We recommend to have qualified personnel to proceed with the installation, in particular for the earthing of the external copper covering.
