Cube cement lampshade for suspension, with cable clamp and E27 lamp holder

Finish: Light cement

Description

The Cube cement lampshade, characterized by wide and regular shapes, is not a simple cover for the lamp holder, but a real **furnishing element** able to give strong personality and perfectly complete **large and bright environments, such as lofts and living rooms with a minimal and industrial style.**

The very nature of the material and the manufacturing process mean that each concrete lampshade has a slightly irregular surface that is different from all the others, making it to all intents and purposes a unique item!

Choose the finish you prefer among those available and match the Cube cement lampshade with one of our fabric covered cables from the Vertigo Optical line to create an original contrast, or choose classic colours to make the lampshade the real protagonist of the room you are decorating.

With the Cube Concrete Lampshade you need the **3x0.75 cables** Creative-Cables, available both twisted and round!

Attention! Bulb NOT included.
