Decentraliser, ceiling hook for fabric electrical cables with stop
Finish: Transparent

Description

The ceiling decentraliser is used to shift the drop of a pendant lamp in relation to the ceiling rose or to hook a cable to the ceiling.

The catch screw ensures a secure grip and stops the cable from sliding. Choose the finish that best matches the style of your indoor space: if you prefer a concealed effect, the transparent finish will be perfect!

Suitable for cables of up to 8mm cross-section and is fully compatible with all our fabric covered lighting cables..
Package includes screw and wall plug.

Warning! This product is not suitable for large section cables or nautical cords.
